Kisan Partner – Application Change Requirements

1. Registration

- The registration UI needs to be improved and corrected.
- Add a dropdown to select the **nearest market**.
- Add images for **commodities**.
- Add images for **subcategories** with **multiple selection** support.
- Registration data should be submitted to the **Admin panel** for verification.
- Until the admin approves the registration, the user should **not get access** to the application.
- Admin should have options to **Approve**, **Hold**, or **Reject** registrations.

---

2. Login

- The **"Register Now"** option should be clearly highlighted.

---

3. Farmer Homepage

- Recently added crops should be displayed.
- The **"Accept Offer"** option should be changed to **"Add to Cart"**.
- Farmers should receive **notifications** when a bid is placed or when an offer is accepted.

---

4. Post Sale

- Add images for **categories**.
- Add images for **subcategories**.
- While selecting quantity, options should be available for:
  - Crate
  - Ton
  - Quintal
- In the **Add Grader** section, allow selecting the **package type and quantity type only once**.
- The **nearest market** should be automatically fetched from the farmer's registration data.

5. My Crops

- Display trader information showing **which trader is offering** for the crop.

6. Trader Homepage

- Add a **Loan section**.

7. Transporter

- Transporters should receive notifications when a product from their **registered pincode** is accepted by a trader.
- Transporters should be allowed to **accept more than one transportation request per day**.

8. Admin Panel

- Add a **Subcategory Management** page.
- Add a **Sub-Admin Management** page.
- Implement **Role-Based Access Control (RBAC)**.
- Add an **Admin Dashboard**.
- Add an **Orders page** where invoices are generated for both farmers and traders.
- The invoice should include:
  - Commission details
  - Transportation charges
- Enable **invoice generation** functionality.
- Ensure data is **synchronized correctly** between Admin, Farmer, and Trader panels.
- Add functionality to:
  - Add crops
  - View traders' bids
  - Manage accepted offers
  - Track payment status (Pending / Completed)
  - Track delivery status
  - Track shipment status
